graphic design, interior design.

Interests

Travel, read, programming, arts.

WORK EXPERIENCE

2023 – Current Fundão, Portugal

Capgemini Engineering

Software Developer

- > Collaborated with the R&D Team on the cutting-edge 6G-Brains project, dedicating efforts to the development of a speech recognition system powered by the Mycroft framework in Python. The system's primary objective was to extract and present various features associated with an E2E Network Slice.
- > Utilized Scrum methodology while working in this project to ensure efficient collaboration and timely delivery of results.

2022 – 2023 Fundão, Portugal

Capgemini Engineering

Java Developer - Internship

- > Developed various projects in Java, part of them using Spring Boot framework and microservice architecture.
- > Build of a REST API app with Hibernate ORM and PostgreSQL, using message brokers to perform state transitions using JMS(ActiveMQ) and streaming events (Kafka).
- > Build of a pipeline for microservices capable of creating an image for an application with the Postgres server running from Kubernetes, using tools like Git Server, Jenkins, Archiva and Docker.
- > Use of AWS Cloud, working with Lambda functions, DynamoDB and SQS.

2021 – 2022 Lisboa, Portugal

Track on Performance

Frontend Web Developer

- > Portfolio management process of an internal application, creating the documentation for UI integration, Responsiveness, Validations flowcharts, Relations, Behaviors and Errors.
- > Write modern, performant, and robust code for a diverse array of clients and internal projects.
- > Work with a variety of different languages, frameworks, and content management systems such as JavaScript, TypeScript, React, Node.js, Express, MongoDB, Material UI, etc.
- > Communicate and collaborate with a multi-disciplinary team of front and backend developers on a daily basis.

2014 – 2021 Remote
